

RES-TEK[®]

Acrylic Flooring & Concrete Repair Solutions

Healthcare Facilities

The Cure for the Common Floor

Better Health Outcomes Start from the Bottom Up

One of the least recognized areas of healthcare facilities is the floor, yet it gets the most interaction of any surface in the facility.

Demanding medical environments require many variations in function as well as design. Resinous flooring can be customized to meet those needs with minimal installation time, upkeep, and can be much easier to repair.

Seamless - a Better Alternative

Most commercial flooring has seams that are sensitive to temperature, moisture, heavy traffic or an uneven substrate. The smallest gap can lead to bacteria growth.

No need to take chances. Seamless flooring offers peace of mind that only a continuous, non-porous surface can provide.

Safety First

Slip and falls cost healthcare systems millions of dollars every year. If you could avoid even one, just think of the savings. Res-Tek flooring can accommodate a variety of slip-resistance options depending on the environment.

Less Downtime

Because operating rooms can represent up to 70% of hospital revenue, they can't afford long shut downs. Res-Tek flooring can be ready to go in just 1 hour after the final coat.

Key Performance Benefits

- Quick installation means less downtime for your facility
- Easy to clean, seamless, non-porous
- Slip-resistant surface
- Antimicrobial options available
- Superior durability
- Low maintenance, no stripping or waxing
- Easy to repair or change colors
- Matte finish
- Meets FDA/USDA requirements

Durable enough for your toughest daily traffic.

PUR-Guard™
Cementitious Urethane Flooring

An Ounce of Prevention— RESIST™

You already put out a ton of effort to maintain an aseptic environment in your facility. Why not add another layer of protection by adding an antimicrobial additive to your flooring? Res-Tek offers RESIST™ which can be added to any flooring system and reinforces your current cleaning methods.

A hygienic, seamless floor eliminates opportunities for bacteria to grow or dirt to collect, which is perfect for demanding medical environments.

Design & Color Options

Res-Tek offers unlimited color and design possibilities to match any décor or aesthetic. Choose from our standard blends or we can work with your design team to create a custom look for your facility.

Areas of Use

- Surgical Suites
- Patient Rooms / Bathrooms
- Clinics
- Sterile Environments
- Outpatient Care Centers
- Lab Areas
- Cafeterias / Kitchens
- Hallways & Corridors
- Parking Garages
- Locker Rooms / Showers

Non-porous, Stain-resistant, Easily cleanable, Slip-resistant.

Integrated Cove Base

Other sheet goods flooring can have seam separation, allowing bacteria to grow. An integrated cove base continues the seamless floor up the wall up to 6 inches, allowing any sterile environment to be easily maintained.

The Res-Tek Advantage

The only things better than our products are our technical support, customer service, and training. Our flooring specialists work with you to choose the right system and oversee the project to make sure everything goes smoothly. Our network of certified applicator partners work with us to deliver an excellent finished product you can depend on for years to come.

Res-Tek is ready to work with you to design a system tailored to the individual needs of your facility. Request a site visit at www.Res-Tek.net or contact us at 1-888-ResTek1 (888-737-8351).

The Res-Tek Difference — Made in the USA

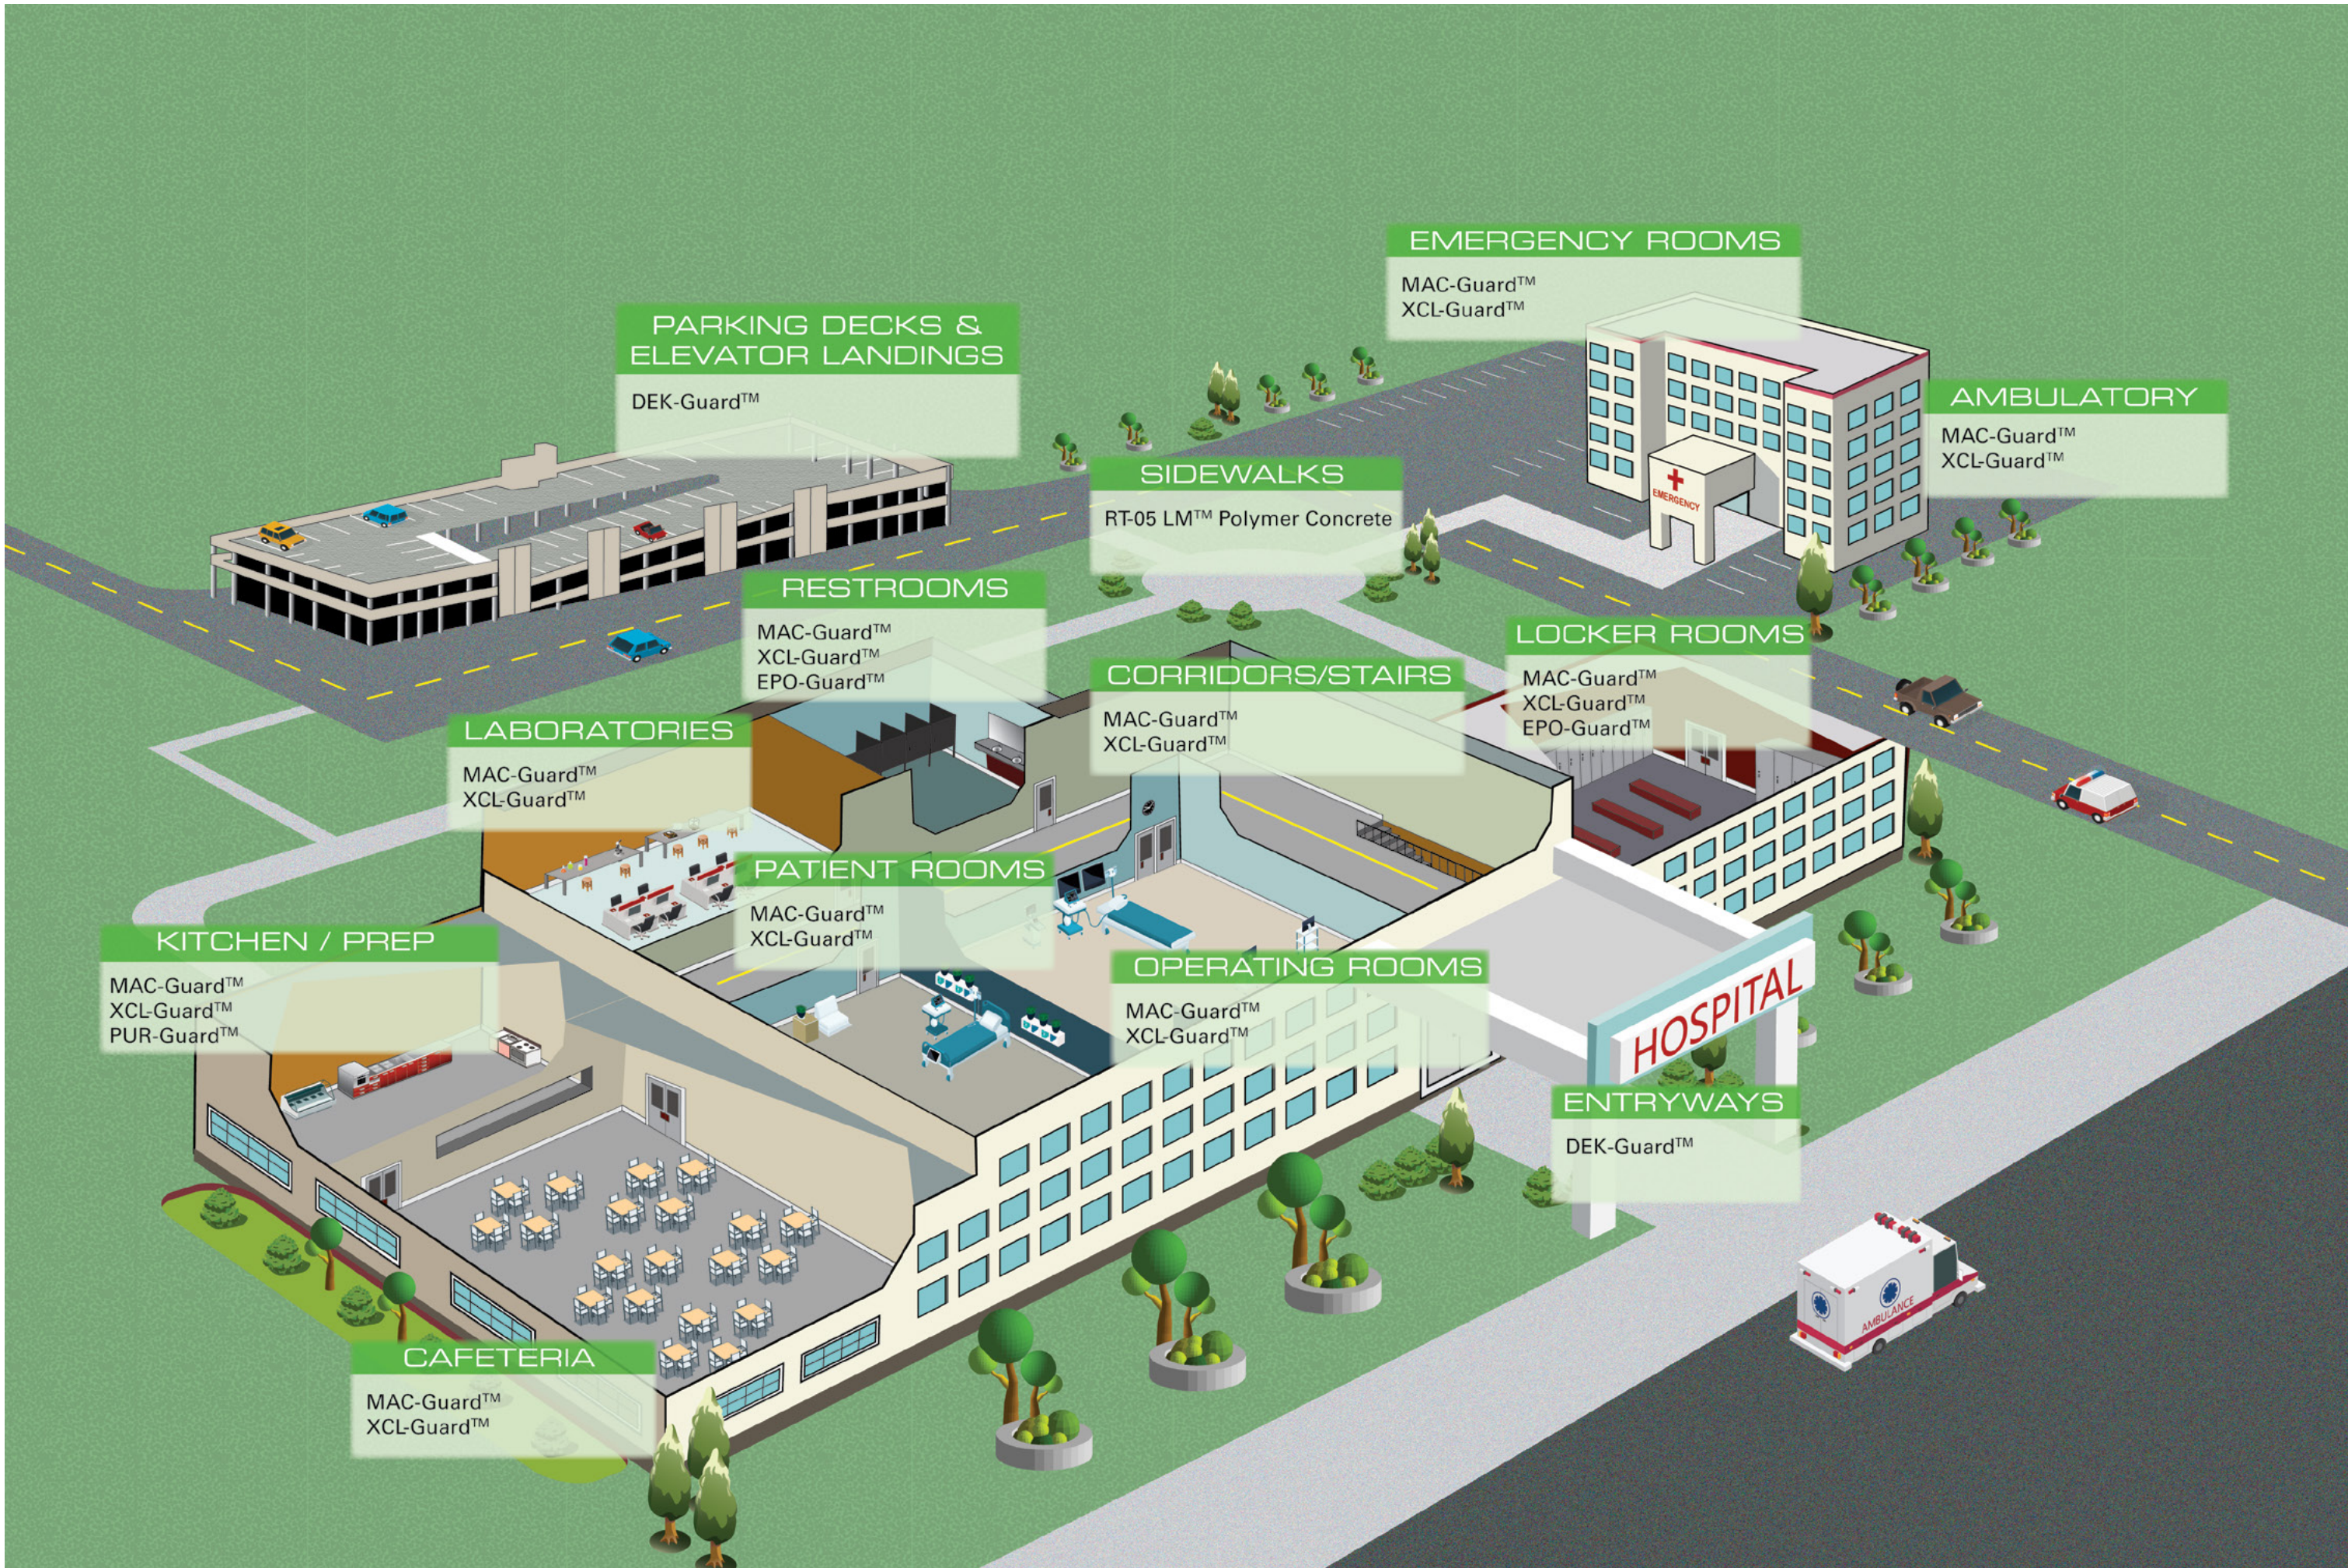

Res-Tek is a leading US manufacturer dedicated to the formulation and production of resin-based acrylic flooring systems, cementitious urethane, epoxies, and polyaspartics. Our products are made in our facility in Georgia, not overseas, eliminating long lead times and keeping your project on schedule. Our products perform consistently and have been chosen by industry leaders throughout North America.
